<u>Chapter</u>		<u>Page</u>
Introduction		
Volume I – Stormwater Management Manual		
Chapter 1	Introduction	
1.1	Past Stormwater Management Practices	1-2
1.2	Water Quantity.....	1-3
1.3	Water Quality.....	1-5
Nutrients.....		1-7
Solids – Sediments and Floatables.....		1-7
Pathogens		1-7
Thermal Impacts		1-8
Hydrocarbons		1-8
Toxic Organics.....		1-8
Acids		1-8
Humic Substances		1-8
Salt		1-8
Metals.....		1-8
References.....		1-9
Chapter 2	DEP Stormwater Management Objectives	
2.1	Problems with Traditional BMP Designs	2-1
Failure to Protect Stream Channel Integrity		2-1
Inadequate Pollutant Removal		2-3
Inadequate Shading		2-3
Lack of Maintenance.....		2-3
Failures and Replacement.....		2-4
2.2	The Four Stormwater Management Objectives	2-5
Effective Pollutant Removal		2-5
Cooling.....		2-5
Channel Protection.....		2-6
Flood Control		2-6
2.3	BMPs to Achieve Objectives	2-6
Vegetated Buffers		2-6
Underdrained Soil Media Filters.....		2-7
Infiltration		2-7
Wet Pond with Underdrained Gravel Filter		2-8
References.....		2-8
Chapter 3	Low Impact Development	
3.1	Problems LID Addresses	3-2
3.2	LID Design Practices	3-3

<u>Chapter</u>	<u>Page</u>
	Minimize Impervious Areas 3-3
	Limit Areas of Clearing and Grading 3-4
	Minimize Directly Connected Impervious Areas 3-4
	Manage Stormwater at the Source 3-5
3.3	Soil Considerations 3-6
	Minimize Compaction 3-6
	Increase Organic Content of Soils 3-6
	Avoid Pesticides 3-6
3.4	LID Techniques 3-7
	Bioretention Areas or Raingardens 3-7
	Filter Strips 3-8
	Vegetated Buffers 3-8
	Vegetated Wet or Dry Swales 3-9
	Infiltration Trenches 3-9
	Porous Pavement 3-10
	Dry Well 3-11
	Rain Barrels & Cisterns 3-11
	Level Spreader 3-12
	Rooftop Greening 3-12
	More Information 3-12
3.5	Getting Started 3-13
	What Can Communities Do? 3-13
	What Can Individuals Do? 3-13
Chapter 4	Pollution Prevention
4.1	Long-Term BMP Maintenance 4-2
4.2	Street Sweeping 4-3
4.3	Sand and Salt Management 4-6
4.4	Fertilizer Management 4-7
4.5	Pesticide Management 4-8
4.6	Materials Management 4-12
Chapter 5	Stormwater Design Considerations
5.1	Incorporate Low Impact Development (LID) 5-1
5.2	Sizing and Siting of Drainage Controls 5-2
5.3	Provide Pretreatment on all BMPs 5-3
5.4	No Bypasses 5-4
5.5	Adapt to Site-Specific Conditions 5-4
5.6	Consider Northern Climate Issues 5-5
5.7	Insure Continuing Maintenance of All Stormwater Controls 5-5

List of Tables

Table 1-1	Typical Impervious Area Percentages	1-3
Table 1-2	Summary of Urban Non-point Source Pollutants	1-6
Table 4-1	Inspection and Corrective Action for Structural BMPs.....	4-4

List of Figures

Figure 1-1	Effects of Development on the Water Budget	1-3
Figure 1-2	Relationship Between Infiltration, Runoff, Evapotranspiration and Imperviousness	1-3
Figure 1-3	Typical Stormwater Runoff Hydrograph Pre and Post Development	1-4
Figure 1-4	Effects of Development on Flooding Magnitude and Frequency	1-4
Figure 1-5	Land Use Affects on the Quality of Runoff Water	1-5
Figure 2-1	Pre and Post Development Hydrographs	2-2
Figure 2-2	Pre and Post Development Hydrographs with Peak Control	2-2
Appendix I-A Raingarden Layouts		
Appendix I-B Landscape Design Standards
